

McNally Industries Catalogue For Helicopter Maintenance and Special Equipment Tooling

Blade Clamp Assembly

Engineered in conjunction with Army PM to accommodate all Hawk variants & Apache. With the induction of the new "M" wide chord blade into the fleet, the task was to design a clamp adaptable to all Hawk blade geometries. This new product provides benefits in personnel safety and time savings as well as added protection for the aircraft.

PN 1006845: This part number includes the entire blade clamp assembly, two sets of blade liners and Hardigg case.

When ordering **PN 1006800** please specify which airframe model being purchased (i.e. Black Hawk M,A/L or R/S, Apache). The "M" variation of the clamp will support the S-92.

Please specify if you do not wish for Hardigg cases to be included in this kit and prices will be adjusted down.

Spindle Bender Assembly

This special tooling was designed to be used on legacy Blackhawk aircraft and will improve serviceability of key points of the airframe and rotor system.

PN 1006748: This part number includes the entire assembly including the pelican case.

Please specify if you do not wish for Pelican cases to be included in this kit and prices will be adjusted down.

McNally Industries Catalogue For Helicopter Maintenance and Special Equipment Tooling

Torque Adapter Tooling for Black Hawk

PN 1006767: This wrench kit consists of three 3/8" drive tools (9/16, 7/16, and 9/16) utilized on the tail rotor drive shaft, gimbal mount, and lower pressure plate adapter. Wrench numbers 1006769, 1006770, and 1006771

PN 1006772: This tooling kit consists of two 1/2" drive bent wrenches utilized in the 5/8" twelve point pylon mount A and B. Wrench PN 1006774 and 1006775

PN 1006776: This part number specifies one wrench which is a heavy duty torque wrench utilized on the main landing gear.

Please specify if you do not wish for Pelican cases included.

Star Plate Assembly

This assembly is a color coded reference tool which, when utilized assists in maintaining the location of hardware while balancing the tail rotor of the Black Hawk UH-60.

PN 1006779: This kit consists of the entire star plate assembly including the Pelican case.

Please specify if you do not wish for Pelican cases to be included in this kit and prices will be adjusted down.

Seal Installation Tool Assembly

This is a special tool for installing the tail rotor input drive seal on the H-60 series helicopters. The design has potential to drastically reduce the installation time and expense of scraping seals in the process. Very simple & user-friendly design. **PN B101216**

McNally Industries Price List For Helicopter Maintenance and Special Equipment Tooling

Description	Part Number	NSN	Qty	Price	Comments
Spindle Bender	1006748	4920-01-554-9692	1	\$1,820	No- Pelican Cases, deduct \$350 each.
			10	\$1,775	
			30	\$1,750	
Spindle Bender w/ (2 Piece Design)	B101210		1	\$1,950	No- Pelican Cases, deduct \$350 each.
			10	\$1,900	
			30	\$1,875
